

[illegible]

Dear Mr. Alcorn:

We currently have a fleet of over 1,800 relocatable classrooms in California that we rent to school districts throughout the state; these buildings have all been built to state-approved energy codes. Furthermore, we will buy as many new units as the market demands of us, which can easily be several hundred a year. Therefore, I am very interested in codes affecting the functionality of my existing fleet, and the pricing of future fleet. In light of this, we would like to be an industry-citizen partner with CEC as you move forward. I will have a representative of Williams Scotsman, Rob Gebhard, at your meeting tomorrow to help us get more deeply involved in the process currently under way.

Thank you.
